

StudentVoice Basics Workshop Evaluation

Population for survey: Attendees of the StudentVoice Basics Workshop, August 6, 2009

Response Rate: 6 of 7 participants completed survey

Summary of Key Findings:

- All respondents felt more comfortable using StudentVoice.
- All respondents reported that they knew how to do the following: preview a project, look at the outline view of a project, filter data, and view graphs.
- The presenters' communication style had an average of 3.67 on a 4-point scale of usefulness.
- A major theme in the written comments related to walking through the steps on the computer and how that increased understanding.
- A few comments reflected that the content included a basic introduction (which some participants did not need) and more detail which was beneficial.

Actions Taken:

- A more advanced workshop was offered to those who already feel comfortable with the basics and wanted to gain additional skills in analyzing results, particularly for report-writing.
- The feedback was shared with the presenters for training purposes.
- Future workshops will continue to utilize a computer lab so that participants can learn by doing.
