

Orientation Survey Spring 2010

Summary of Key Findings:

- Majority of students understand academic requirements and received enough time with an academic advisor, though many would still like more time/one-on-one time with an advisor.
- Students would like more staff members available to answer questions (during program and when registering for classes)
- Students stated that one of the aspects of Orientation they enjoyed most was hearing about opportunities outside of requirements (Honors, UGS 1010, EDPS 2600)
