

## **Swoop Camp: Spirit**

### **Brief description of project:**

The assessment was developed to assess the experience had by students who attended the first annual Swoop Camp: Spirit.

**Who was asked to complete the survey:** Students who attended Swoop Camp: Spirit 2013

**Respondents:** 34

**Administration Type:** paper with link for data entry

### **Summary of Key Findings:**

- All but one student in attendance was from out of state- we will need to look at attracting more instate students.
- Students were satisfied with the amount of information about campus resources
- 85.29 indicated that the program was either effective or very effective in the first stages of their transition to the University of Utah.

### **Actions Taken:**

- This data will be used to tweak the program for next year. We are looking at making the program one day shorter based on the feedback from the participants. We will also explore different methods of information delivery to help students feel more connected to the material and less like they are stuck in lectures.

### **Which department and/or program goals does this program align with?**

We do not currently have an office strategic plan; however the program aligns with our overarching goal of aiding student transition to the University. This program serves as a link between orientation in the summer to students actually coming to campus in the fall and hopefully feeling connected to our community.

### **Which Student Affairs goals does this program align with?**
